Description

Atlantic Fabrications Ltd. is a reputable and growing manufacturing firm in the North East of England, United Kingdom, specialising in high-quality metal fabrication for large-scale industrial projects. We are seeking a dedicated and experienced Welder to join our skilled production team at our facility in North Shields, Tyne and Wear. This role is ideal for candidates who possess foundational welding knowledge, have gained some practical experience, and are committed to producing work of the highest standard.

The Role and Expectations

As a Welder, you will be a vital part of our manufacturing process. Your primary duty will be to accurately and safely join metal components using a variety of welding processes. We are looking for candidates with practical proficiency, particularly in MIG (Metal Inert Gas), TIG (Tungsten Inert Gas), or MMA (Manual Metal Arc) welding, and a keen eye for detail to ensure structural integrity and a clean finish. The role demands an individual who can work efficiently, both independently and as part of a team, under the supervision of a workshop manager. You must be comfortable working in a dynamic factory environment and adhering strictly to safety protocols.

Candidate Profile

We are targeting experienced candidates who have ideally completed a formal apprenticeship or hold a recognised vocational qualification in welding or fabrication. A minimum of 1-3 years of professional experience in a related industrial or manufacturing setting is highly desirable, demonstrating the ability to handle common welding challenges and maintain consistent quality. Crucial skills include the ability to read and correctly interpret complex engineering schematics and technical drawings to ensure precise work execution. Reliability, excellent time management for meeting production deadlines, and a proactive approach to maintaining a clean and safe workstation are essential.
