Skills: Solid proficiency in Python fundamentals, knowledge of web frameworks (e.g., Django, Flask), experience with SQL/NoSQL databases, familiarity with RESTful APIs and integrations, strong problem-solving and debugging abilities, and a willingness to learn new technologies quickly.

Responsibilities: Develop, test, and deploy efficient, reusable Python code for

backend applications, integrate third-party services and APIs, collaborate with cross-functional teams to define project requirements, maintain and optimize existing codebases for performance, and participate in code reviews to ensure high quality standards.

Description: Zenith Hospitality Tech Solutions, a growing innovator in US hotel management software, is seeking a motivated Python Developer to join our remote-friendly team. This role is ideal for lower-level or early-experienced candidates eager to build scalable, high-performance solutions for the hospitality industry. You will contribute directly to our core platform, focusing on backend logic and database management.

We are committed to providing an equal opportunity work environment in the United States. We welcome applications from all qualified global candidates. Securing the necessary work authorization to be legally employed in the United States is the applicant's responsibility.
