commercial and industrial sites. We target candidates with **some professional experience** who are eager to bring their practical knowledge to a new setting and learn German industry best practices.

Key Responsibilities (A detailed breakdown of the work you'll be doing):

- **Install, maintain, and repair** wiring, electrical systems, lighting, and control equipment in commercial and industrial settings.
- **Diagnose and repair** faults in electrical circuits, systems, and equipment using specialized testing apparatus and hand tools.
- **Adhere strictly** to the German electrical safety regulations, primarily the **VDE standards**, and other relevant local codes.
- Read and accurately **interpret blueprints, schematics, and technical diagrams** to plan and execute installations.
- Perform routine and preventative **maintenance inspections** to ensure system functionality and longevity.
- Complete detailed **documentation** for all work performed, including maintenance logs and fault reports.
- Collaborate effectively with project managers, other tradespeople, and clients to ensure timely project completion.
- Commit to continuous **professional development** and stay updated with new electrical technologies and safety protocols.

Required Candidate Profile

We are looking for motivated individuals who possess the following essential qualifications, experience, and skills:

- **Qualifications:** A recognized professional qualification such as a **Vocational Training Certificate (Gesellenbrief)**, or an equivalent electrical engineering diploma or degree.
- **Experience:** A minimum of **2+ years of hands-on experience** in commercial or industrial electrical installation, maintenance, and troubleshooting. Experience with PLC/automation systems is a significant advantage.
